AR-15/M16 Fixed Back-Up Iron Sight

Whether it's your primary optic going down, or simply the desire to transition to iron sights, let our new Fixed Back-Up Iron Sight get the call. With no vertical or horizontal point-of-impact shift when switching from precision to CQB aperture, the Weaver® Back-Up Iron Sight keeps you on target and in the action. The main body is constructed of Type III hard coat anodized 6061 T6 Aluminum with manganese phosphate coated steel components. The sight is fully compatible with MIL-Spec front sights and the ½ MOA clicks are calibrated for carbine length sight radius.

Features & Benefits

- Same plane, offset aperture—no vertical or horizontal point-of-impact shift when switching from precision to CQB aperture
- 6061 T6 Aluminum main body with Type III hard coat anodize finish
- Steel components feature durable Manganese Phosphate finish
- Large clamp for stable attachment
- Works with Milspec front sights
